

## Module Description, available in: EN

# Manufacturing Technologies

#### **General Information**

**Number of ECTS Credits** 

3

Module code

TSM\_ManTech

Valid for academic year

2023-24

Last modification

2019-10-21

Coordinator of the module

Gregor Burkhard (FHNW, gregor.burkhard@fhnw.ch)

Explanations regarding the language definitions for each location:

- Instruction is given in the language defined below for each location/each time the module is held.
- Documentation is available in the languages defined below. Where documents are in several languages, the percentage distribution is shown (100% = all the documentation).
- The examination is available 100% in the languages shown for each location/each time it is held.

	Lausanne			Lugano	Zurich		
Instruction					<b>X</b> E 100%		
Documentation					<b>X</b> E 100%		
Examination					<b>X</b> E 100%		

## **Module Category**

TSM Technical scientific module

## Lessons

2 lecture periods and 1 tutorial period per week

## **Entry level competences**

Prerequisites, previous knowledge

- Knowledge of the product development process (conception phase, realization phase).
- Knowledge of manufacturing processes and material properties.

## Brief course description of module objectives and content

Selected future-oriented manufacturing technologies and procedures with economic aspects of these technologies. Including the improvement of productivity and quality.

### Aims, content, methods

Learning objectives and acquired competencies

To learn about and to understand modern manufacturing methods and systems used to improve productivity and quality.

Contents of module with emphasis on teaching content

Polymer processing				
Special technologies for injection moulding	4 lecture periods			
Trends in Composite processing	6 lecture periods			
Reverse Engineering, Additive Manufacturing	2 lecture periods			
<b>Lightweight Design</b> (Sandwich Structures, Hybrid Technologies)	2 lecture periods			
Cutting process				
Abrasive tools	2 lecture periods			
Tools and coating: Trends	2 lecture periods			
Multiaxis machining: Trends	2 lecture periods			
Sheet metal forming	4 lecture periods			
(Design for) Automated Assembly	4 lecture periods			
TOTAL:	28 lecture periods			

#### **Teaching and learning methods**

Contact hours during the lectures (2 lesson periods per week)

## Literature

Lecturers' scripts, which will contain references to current literature.

#### **Assessment**

**Certification requirements** 

Module does not use certification requirements

Basic principle for exams

As a rule, all the standard final exams for modules and also all resit exams are to be in written form

Standard final exam for a module and written resit exam

Kind of exam

written

**Duration of exam** 

120 minutes

Permissible aids

No aids permitted

Special case: Resit exam as oral exam

Kind of exam

oral

**Duration of exam** 

30 minutes

Permissible aids

No aids permitted
