### Brief course description of module objectives and content

The goal of this module is to help students to further develop their knowledge and skills in academic writing and presenting through the medium of English. Students will learn what it means to write academic texts and to present to an audience in an accurate, appropriate, and convincing manner. The module is divided into a writing and a presenting part.

The writing part of the module focuses on key document types students are expected to master in their academic and professional careers. Using examples and engaging students in practical exercises, the writing part particularly highlights the importance of the academic argument, analysing its structure, components and styles. It looks at how arguments can be built into bigger text blocks that form part of academic text types such as abstracts, introductions, analyses, and others.

The presenting part of the module focuses on how to prepare and deliver academic presentations. How much detail is necessary? Which sources should be referenced? What information should be included in the presentation slides? How do I create interest in the topic? In this second part of the module, the emphasis will be placed on argumentation techniques but also highlight appearance, self-confidence, clarity and orientation to the audience.

Students are encouraged to work on real writing and presentation projects in English as part of the course.

## Aims, content, methods

### Learning objectives and acquired competencies

At the end of the module, students are able

- to produce academic texts in writing and speaking, paying attention to accuracy, argumentation and the intended target audience;
- to reflect critically on the quality of academic texts, both in speaking and writing;
- to assess writing and presentation abilities, using appropriate instruments for self- and peer-assessment;
- to gain some understanding for possible future development in the area of academic writing and presenting.

## Assessment

### Certification requirements

Module uses certification requirements

### Certification requirements for final examinations (conditions for attestation)

#### Zürich

Within the semester,

- students have to actively participate in writing work groups
- students have to submit individual homework assignments in the presenting part

in order to be admitted to the final exam. Details will be published in the syllabus. The semester work does not give marks.

#### Lausanne

Within the semester,

- 1 individual multiple-choice quiz contributes 10% each to the final mark
- 2 individual work assignments (writing and presenting) contribute a total of 20% to the final mark

The final exam then contributes the remaining 70% to the final mark.

### Basic principle for exams

**As a rule, all the standard final exams for modules and also all resit exams are to be in written form**
