Brief course description of module objectives and content

This module will help students to understand how a manufacturer changes its business model to provide a holistic solution to the customer, helping the customer to improve its competitiveness, rather than just engaging the sale of product. Much of the course is based around the transition from pure products to provide product service systems in basic and advanced forms.

Aims, content, methods

Learning objectives and acquired competencies

- To gain an appreciation of the role of servitization in the competitive landscape
- To create innovative value propositions by designing new service offerings and by drawing the customer journey
- To design an integrated ecosystem for services and products
- To understand the move towards a service mind-set
- To develop price strategies for services
- To manage the core processes for successful service delivery
- To manage risks and business benchmarking to identify improvement areas
